- Gigabit WAN port: Perfect for fast cable or fiber-based Internet
- Extra features: WDS, Wlan Bridge, PPTP VPN server, parental control, Multiple SSID and Traffic control
- Easy installation
- 5-Year warranty
- Accessible helpdesk
- Multilingual user manual

SPECIFICATIONS

- 5 YEAR WARRANTY
- Dimensions in mm. (WxHxD): 182x133x260
- Weight in grams: 360
- Standard: 300Mbps (Wireless Draft-N), Backwards compatible with 54Mbps and 11Mbps
- Ports: 4 LAN Gigabit ports, 1 WAN Gigabit port
- Security: WEP, WPA and WPA2 wireless security, Firewall with Intrusion Detection and Stateful Packet Inspection
- General: Supports uPnP, DMZ, DHCP, Virtual server, NAT, DDNS, Port filtering, MAC address filtering, IP filtering and URL filtering, Parental control
- Configuration: Webbased
- Antenna: 3x non-detachable 4dBi antennas

SYSTEM REQUIREMENTS

Type: Repeater, Router
Lan Speed: 10/100/1000
Number ports: 4
Wireless Speed: 300

Gigabit 300N Router

Powerful wireless 300N router for a high performance gigabit network!

DESCRIPTION

With the Eminent EM4571 Gigabit 300N Router you can share your Internet connection at the highest possible speed. This powerful Wireless N router will increase your wireless range significantly! Connect multiple users, wireless or wired! Enjoy the high speed of a Gigabit network and share your Internet connection easily. Thanks to the ultra-fast WAN port, this router is ideal for high-speed cable or fiber Internet, allowing rates of up to 150Mbps!

Use the unique installation wizard to install the EM4571 Gigabit 300N Router for your Internet connection fast and easy. You can also use this wizard to setup your wireless network and security (WEP, WPA, WPA2). If you have a WPS-Enabled wireless device, you can even use the WPS function to secure your network with just one touch of a button!

Advanced network users should know that the Eminent EM4571 Gigabit 300N Router has many additional features. Use the WDS or Wireless bridge features to expand your wireless signal. Just install several Eminent Gigabit 300N Routers in your home or office and be sure that you will have the best signal and throughput everywhere. Thanks to the fast processor with Traffic Monitoring per IP, Protocol or Port your Internet connection will always be as fast as possible. Traffic Monitoring gives you the opportunity to decide for yourself which user or which application gets priority. By doing this you can for example give priority to your game console and play more stable on the Internet.

Extra SSIDs can be added and isolated if needed. This allows you to quickly set up a secondary wireless network for guest users. This is an ideal solution for business locations that need to keep clients separated from the company network. Even at home this comes in very handy. You can grant access to your guest to the Internet without allowing them to log on your private home network.

The Eminent EM4571 Gigabit 300N Router is backwards compatible with 54/11Mbps wireless devices, and standard 100Mbit wired networks. You can still use your existing wireless or wired network adapter to connect. To gain maximum speeds and range we advise you to use an Eminent N network adapter and/or a Gigabit network adapter.
