

LANCOM 1681V

Compact business VPN router with integrated VDSL modem

- High-speed Internet; integrated VDSL2 modem
- Site connectivity with 5 simultaneous IPsec VPN channels (optionally 25 channels)
- Network virtualization with up to 8 virtual networks on one device
- High availability with optional UMTS/3G backup, and VRRP
- Security from the stateful-inspection firewall and optional content filter
- Configuration with the free LANCOM Management System and via web interface

The LANCOM 1681V with its integrated VDSL2 modem opens up the high-speed world of VDSL to business customers. The compact device allows businesses to use professional router features such as IPsec VPN and virtualization in conjunction with the high data rates available with VDSL. This combination enables business users to make best use of a VDSL connection and, at low cost, use high-bandwidth networking to establish performance site connectivity. ADSL2+ is no longer fast enough for your company's networking requirements? VDSL offers you much higher upstream and downstream data rates than ADSL. The LANCOM 1681V and its extensive range of features together with the moderate costs of broadband is an ideal combination for setting up a powerful company network. The high VDSL data rates ensure the rapid provision of data at the main office and also fast VPN-based remote access to the company network. This is important for the network-based storage and editing of large files such as construction plans, brochures or video material.

More Security.

The stateful-inspection firewall in the LANCOM 1681V protects the network with intrusion prevention, Denial-of-Service protection, and access control by means of MAC or IP address. Flexible bandwidth management guarantees the availability of all network applications. Extensive Quality-of-Service features allow you to prioritize different applications such as Internet surfing and VoIP telephony. The VPN gateway in the LANCOM 1681V with its 5 simultaneous IPsec channels and high-security encryption by 3-DES or AES provides optimal security for VPN connections. The LANCOM 1681V caters for almost unlimited mobility in conjunction with the separately available LANCOM Advanced VPN Client for Windows or Mac OS X. Thanks to IPsec-over-HTTPS (based on the NCP VPN Path Finder Technology), secure VPN access to the company network is even possible where IPsec VPN is blocked (e.g. in UMTS/3G networks or at hotspots). The LANCOM 1681V backs-up your Internet connection with a range of flexible options: A UMTS/3G stick plugged into the USB port of the LANCOM 1681V provides a wireless, economically priced backup option. In addition, the device's serial port and the LANCOM Serial Adapter Kit allow an additional modem (analog or GSM) to be connected up.

More Management.

LCMS, the LANCOM Management System, is a free software package for the LANCOM 1681V. It caters for the configuration of the device, remote maintenance and network monitoring. The central component of LCMS, LANconfig, is used to configure the LANCOM 1681V and other LANCOM devices on the network. LANmonitor offers detailed, real-time monitoring of parameters, it provides access to log files and statistics, and it can carry out a detailed trace-protocol analysis. Other functions in LCMS include the firewall GUI for object-oriented setup of the firewall, automatic backup of configurations and scripts, and the intuitive folder structure with convenient search function.

More Virtualization.

The LANCOM 1681V helps you to use your IT resources more effectively and save costs. The device can simultaneously support multiple, independent networks. This is made possible by the powerful technology Advanced Routing and Forwarding (ARF). The ARF function on the LANCOM 1681V provides up to eight virtual networks, each with its own settings for DHCP, DNS, routing and firewall. ARF allows multiple separate networks for different groups and applications to be operated on a single physical infrastructure.

More Reliability for the Future.

From the very start, LANCOM products are designed for a product life of several years. They are equipped with hardware dimensioned for the future. Even reaching back to older product generations, updates to the LANCOM Operating System—LCOS—are available several times a year, free of charge and offering major features. LANCOM offers unbeatable safeguarding of your investment.

Firewall		
	Incoming/Outgoing Traffic inspection based on connection information. Trigger for firewall rules depending on backup status, e.g. simplified rule	
Stateful inspection firewall	sets for low-bandwidth backup lines. Limitation of the number of sessions per remote site (ID)	
Packet filter	Check based on the header information of an IP packet (IP or MAC source/destination addresses; source/destination ports, DiffServ attribute); remote-site dependant, direction dependant, bandwidth dependant	
Extended port forwarding	Network Address Translation (NAT) based on protocol and WAN address, i.e. to make internal webservers accessible from WAN	
N:N IP address mapping	N:N IP address mapping for translation of IP addresses or entire networks	
Tagging	The firewall marks packets with routing tags, e.g. for policy-based routing	
Actions	Forward, drop, reject, block sender address, close destination port, disconnect	
Notification	Via e-mail, SYSLOG or SNMP trap	
Quality of Service		
Traffic shaping	Dynamic bandwidth management with IP traffic shaping	
Bandwidth reservation	Dynamic reservation of minimum and maximum bandwidths, totally or connection based, separate settings for send and receive directions. Setting relative bandwidth limits for QoS in percent	
DiffServ/TOS	Priority queuing of packets based on DiffServ/TOS fields	
Packet-size control	Automatic packet-size control by fragmentation or Path Maximum Transmission Unit (PMTU) adjustment	
Layer 2/Layer 3 tagging	Automatic or fixed translation of layer-2 priority information (IEEE 802.11p-marked Ethernet frames) to layer-3 DiffServ attributes in routing mode. Translation from layer 3 to layer 2 with automatic recognition of 802.1p-support in the destination device	
Security		
Intrusion Prevention	Monitoring and blocking of login attempts and port scans	
IP spoofing	Source IP address check on all interfaces: only IP addresses belonging to the defined IP networks are allowed	
Access control lists	Filtering of IP or MAC addresses and preset protocols for configuration access and LANCAPI	
Denial of Service protection	Protection from fragmentation errors and SYN flooding	
General	Detailed settings for handling reassembly, PING, stealth mode and AUTH port	
URL blocker	Filtering of unwanted URLs based on DNS hitlists and wildcard filters. Extended functionality with Content Filter Option	
Password protection	Password-protected configuration access can be set for each interface	
Alerts	Alerts via e-mail, SNMP-Traps and SYSLOG	
Authentication mechanisms	PAP, CHAP, MS-CHAP and MS-CHAPv2 as PPP authentication mechanism	
Anti-theft	Anti-theft ISDN site verification over B or D channel (self-initiated call back and blocking)	
Adjustable reset button	Adjustable reset button for 'ignore', 'boot-only' and 'reset-or-boot'	
High availability / redundancy		
VRRP	VRRP (Virtual Router Redundancy Protocol) for backup in case of failure of a device or remote station. Enables passive standby groups or reciprocal backup between multiple active devices including load balancing and user definable backup priorities	
FirmSafe	For completely safe software upgrades thanks to two stored firmware versions, incl. test mode for firmware updates	
UMTS backup*	Operation of an external UMTS/HSDPA USB card at the USB host port	
ISDN backup*	In case of failure of the main connection, a backup connection is established over ISDN. Automatic return to the main connection	
Load balancing	Static and dynamic load balancing over up to 2 WAN connections. Channel bundling with Multilink PPP (if supported by network operator)	
VPN redundancy	Backup of VPN connections across different hierarchy levels, e.g. in case of failure of a central VPN concentrator and re-routing to multiple distributed remote sites. Any number of VPN remote sites can be defined (the tunnel limit applies only to active connections). Up to 32 alternative remote stations, each with its own routing tag, can be defined per VPN connection. Automatic selection may be sequential, or dependant on the last connection, or random (VPN load balancing)	
Line monitoring	Line monitoring with LCP echo monitoring, dead-peer detection and up to 4 addresses for end-to-end monitoring with ICMP polling	
*) Note:	A UMTS USB modem is not supplied. Supported UMTS USB modem at www.lancom.eu/umts-support	
VPN		
IPSec over HTTPS	Enables IPsec VPN based on TCP (at port 443 like HTTPS) which can go through firewalls in networks where e. g. port 500 for IKE is blocked. Suitable for client-to-site connections (with LANCOM Advanced VPN Client 2.22 or later) and site-to-site connections (LANCOM VPN gateways or routers with LCOS 8.0 or later). IPSec over HTTPS is based on the NCP VPN Path Finder technology	

VPN	
Number of VPN tunnels	Max. number of concurrent active IPSec and PPTP tunnels (MPPE): 5 (25 with VPN 25 Option). Unlimited configurable connections. Configuration of all remote sites via one configuration entry when using the RAS user template or Proadaptive VPN.
Hardware accelerator	Integrated hardware accelerator for 3DES/AES encryption and decryption
Realtime clock	Integrated, buffered realtime clock to save the date and time during power failure. Assures timely validation of certificates in any case
Random number generator	Generates real random numbers in hardware, e. g. for improved key generation for certificates immediately after switching-on
1-Click-VPN Client assistant	One click function in LANconfig to create VPN client connections, incl. automatic profile creation for the LANCOM Advanced VPN Client
1-Click-VPN Site-to-Site	Creation of VPN connections between LANCOM routers via drag and drop in LANconfig
IKE	IPSec key exchange with Preshared Key or certificate
Certificates	X.509 digital multi-level certificate support, compatible with Microsoft Server / Enterprise Server and OpenSSL, upload of PKCS#12 files via HTTPS interface and LANconfig. Simultaneous support of multiple certification authorities with the management of up to nine parallel certificate hierarchies as containers (VPN-1 to VPN-9). Simplified addressing of individual certificates by the hierarchy's container name (VPN-1 to VPN-9). Wildcards for certificate checks of parts of the identity in the subject. Secure Key Storage protects a private key (PKCS#12) from theft
Certificate rollout	Automatic creation, rollout and renewal of certificates via SCEP (Simple Certificate Enrollment Protocol) per certificate hierarchy
Certificate revocation lists (CRL)	CRL retrieval via HTTP per certificate hierarchy
OCSP Client	Check X.509 certifications by using OCSP (Online Certificate Status Protocol) in real time as an alternative to CRLs
XAUTH	XAUTH client for registering LANCOM routers and access points at XAUTH servers incl. IKE-config mode. XAUTH server enables clients to register via XAUTH at LANCOM routers. Connection of the XAUTH server to RADIUS servers provides the central authentication of VPN-access with user name and password. Authentication of VPN-client access via XAUTH and RADIUS connection additionally by OTP token
RAS user template	Configuration of all VPN client connections in IKE ConfigMode via a single configuration entry
Proadaptive VPN	Automated configuration and dynamic creation of all necessary VPN and routing entries based on a default entry for site-to-site connections. Propagation of dynamically learned routes via RIPv2 if required
Algorithms	3DES (168 bit), AES (128, 192 or 256 bit), Blowfish (128 bit), RSA (128 or -448 bit) and CAST (128 bit). OpenSSL implementation with FIPS-140 certified algorithms. MD-5 or SHA-1 hashes
NAT-Traversal	NAT-Traversal (NAT-T) support for VPN over routes without VPN passthrough
IPCOMP	VPN data compression based on LZS or Deflate compression for higher IPSec throughput on low-bandwidth connections (must be supported by remote endpoint)
LANCOM Dynamic VPN*	Enables VPN connections from or to dynamic IP addresses. The IP address is communicated via ISDN B- or D-channel or with the ICMP or UDP protocol in encrypted form. Dynamic dial-in for remote sites via connection template
Dynamic DNS	Enables the registration of IP addresses with a Dynamic DNS provider in the case that fixed IP addresses are not used for the VPN connection
Specific DNS forwarding	DNS forwarding according to DNS domain, e.g. internal names are translated by proprietary DNS servers in the VPN. External names are translated by Internet DNS servers
Content Filter (optional)	
Demo version	Activate the 30-day trial version after free registration under http://www.lancom.eu/routeroptions
URL filter database/rating server	Worldwide, redundant rating servers from IBM Security Solutions for querying URL classifications. Database with over 100 million entries covering about 10 billion web pages. Web crawlers automatically search and classify web sites to provide nearly 150,000 updates per day: They use text classification by optical character recognition, key word searches, classification by word frequency and combinations, web-site comparison of text, images and page elements, object recognition of special characters, symbols, trademarks and prohibited images, recognition of pornography and nudity by analyzing the concentration of skin tones in images, by structure and link analysis, by malware detection in binary files and installation packages
HTTPS filter	Additional filtering of HTTPS requests with separate firewall entries
Categories/category profiles	Filter rules can be defined in each profile by collecting category profiles from 58 categories, for example to restrict Internet access to business purposes only (limiting private use) or by providing protection from content that is harmful to minors or hazardous content (e.g. malware sites). Clearly structured selection due to the grouping of similar categories. Content for each category can be allowed, blocked, or released by override
Override	Each category can be given an optional manual override that allows the user to access blocked content on a case-by-case basis. The override operates for a limited time period by blocking the category or domain, or a combination of both. Optional notification of the administrator in case of overrides
Black-/whitelist	Lists that are manually configured to explicitly allow (whitelist) or block (blacklist) web sites for each profile, independent of the rating server. Wildcards can be used when defining groups of pages or for filtering sub pages
Profiles	Timeframes, blacklists, whitelists and categories are collected into profiles that can be activated separately for content-filter actions. A default profile with standard settings blocks racist, pornographic, criminal, and extremist content as well as anonymous proxies, weapons/military, drugs, SPAM and malware

Content Filter (optional)	
Time frames	Timeframes can be flexibly defined for control over filtering depending on the time of day or weekday, e.g. to relax controls during break times for private surfing
Flexible firewall action	Activation of the content filter by selecting the required firewall profile that contains content-filter actions. Firewall rules enable the flexible use of your own profiles for different clients, networks or connections to certain servers
Individual display pages (for blocked, error, override)	Response pages displayed by the content filter in case of blocked sites, errors or overrides can be custom designed. Variables enable the inclusion of current information such as the category, URL, and rating-server categorization. Response pages can be issued in any language depending on the language set in the user's web browser
Redirection to external pages	As an alternative to displaying the device's own internal response pages to blockings, errors or overrides, you can redirect to external web servers
License management	Automatic notification of license expiry by e-mail, LANmonitor, SYSLOG or SNMP trap. Activation of license renewal at any time before expiry of the current license (the new licensing period starts immediately after expiry of the current license)
Statistics	Display of the number of checked and blocked web pages by category in LANmonitor. Logging of all content-filter events in LANmonitor; log file created daily, weekly or monthly. Hit list of the most frequently called pages and rating results. Analysis of the connection properties; minimum, maximum and average rating-server response time
Notifications	Messaging in case of content-filter events optionally by e-mail, SNMP, SYSLOG or LANmonitor
Wizard for typical configurations	Wizard sets up the content filters for a range of typical scenarios in a few simple steps, including the creation of the necessary firewall rules with the corresponding action
Max. users	Simultaneous checking of HTTP traffic for a maximum of 50 different IP addresses in the LAN
VoIP	
SIP ALG	The SIP ALG (Application Layer Gateway) acts as a proxy for SIP communication. For SIP calls the ALG opens the necessary ports on the firewall for the corresponding media packets. By using automatic address translation for devices inside the LAN, the use of STUN is no longer needed.
Routing functions	
Router	IP and NetBIOS/IP multi-protocol router
Advanced Routing and Forwarding	Separate processing of 8 contexts due to virtualization of the routers. Mapping to VLANs and complete independent management and configuration of IP networks in the device, i.e. individual settings for DHCP, DNS, Firewalling, QoS, VLAN, Routing etc. Automatic learning of routing tags for ARF contexts from the routing table
НТТР	HTTP and HTTPS server for configuration by web interface
DNS	DNS client, DNS server, DNS relay, DNS proxy and dynamic DNS client
DHCP	DHCP client, DHCP relay and DHCP server with autodetection. Cluster of several LANCOM DHCP servers per context (ARF network) enables caching of all DNS assignments at each router. DHCP forwarding to multiple (redundant) DHCP servers
NetBIOS	NetBIOS/IP proxy
NTP	NTP client and SNTP server, automatic adjustment for daylight-saving time
Policy-based routing	Policy-based routing based on routing tags. Based on firewall rules, certain data types are marked for specific routing, e.g. to particular remote sites or lines
Dynamic routing	Dynamic routing with RIPv2. Learning and propagating routes; separate settings for LAN and WAN. Extended RIPv2 including HopCount, Poisoned Reverse, Triggered Update for LAN (acc. to RFC 2453) and WAN (acc. to RFC 2091) as well as filter options for propagation of routes. Definition of RIP sources with wildcards
Layer 2 functions	
VLAN	VLAN ID definable per interface and routing context (4,094 IDs) IEEE 802.1Q
ARP lookup	Packets sent in response to LCOS service requests (e.g. for Telnet, SSH, SNTP, SMTP, HTTP(S), SNMP, etc.) via Ethernet can be routed directly to the requesting station (default) or to a target determined by ARP lookup
COM port server	
COM port forwarding	COM-port server for DIN and USB interfaces. For multiple serial devices connected to it, the server also manages its own virtual COM ports via Telnet (RFC 2217) for remote maintenance (works with popular virtual COM-port drivers compliant with RFC 2217). Switchable newline conversion and alternative binary mode. TCP keepalive according to RFC 1122 with configurable keepalive interval, retransmission timeout and retries
USB print server	
Print server (USB 2.0)	Host port for connecting USB printers via RAW-IP and LPD; bi-directional data exchange is possible
LAN protocols	
IP	ARP, proxy ARP, BOOTP, LANCAPI, DHCP, DNS, HTTP, HTTPS, IP, ICMP, NTP/SNTP, NetBIOS, PPPoE (server), RADIUS, RIP-1, RIP-2, RTP, SIP, SNMP, TCP, TFTP, UDP, VRRP

WAN protocols	WAN protocols		
ADSL, Ethernet	PPPOE, Multi-PPPOE, ML-PPP, PPTP (PAC or PNS) and IPOE (with or without DHCP), RIP-1, RIP-2, VLAN		
ISDN	1TR6, DSS1 (Euro-ISDN), PPP, X75, HDLC, ML-PPP, V.110/GSM/HSCSD, Stac data compression		
VDSL	VDSL2 with internalmodem		
xDSL (ext. modem)	ADSL1, ADSL2 or ADSL2+ with external ADSL2+ modem		
UMTS/HSDPA* (ext. module)	UMTS/HSDPA with external module at the USB interface		
ISDN	ISDN data or voice usage via internal ISDN interface		
*) Note:	A UMTS USB modem is not supplied. Supported UMTS USB modems at www.lancom.eu/umts-support		
Interfaces			
WAN: VDSL	■ VDSL2 compliant with ITU G.993.2, profiles 8a, 8b, 8c, 8d, 12a, 12b, 17a		
	 LANCOM 1681V over ISDN compliant to: ADSL2+ over ISDN as per ITU G.992.5 Annex B, ADSL2 over ISDN as per ITU G.992.3 Annex B, ADSL over ISDN as per ITU G.992.1 Annex B LANCOM 1681V over POTS compliant to: ADSL2+ over POTS as per ITU G.992.5 Annex A/Annex M, ADSL2 over POTS as per ITU G.992.3 Annex A/Annex M, ADSL over POTS as per ITU.G.992.1 Annex A Supports one virtual ATM circuit (VPI, VCI pair) at a time For Business ADSL connectors with static IP and without padding from Deutsche Telekom, we recommend using an ext. ADSL modem 		
Ethernet ports	4 individual 10/100-Mbps Fast Ethernet ports; two can be switched as additional WAN ports. Ethernet ports can be electrically disabled within		
'	LCOS configuration		
Port configuration	Each Ethernet port can be freely configured (LAN, DMZ, WAN, monitor port, off). LAN ports can be operated as a switch or separately. Additionally, external DSL modems or termination routers can be operated as a WAN port with load balancing and policy-based routing. DMZ ports can be operated with their own IP address range without NAT		
USB 2.0 host port	USB 2.0 hi-speed host port for connecting USB printers (USB print server), serial devices (COM port server), USB data storage (FAT file system) or supported 3G USB modems; bi-directional data exchange is possible*		
ISDN	ISDN BRI port (S0 bus)		
Serial interface	Serial configuration interface / COM port (8 pin Mini-DIN): 9,600 - 115,000 baud, suitable for optional connection of analog/GPRS modems. Supports internal COM port server and allows for transparent asynchronous transmission of serial data via TCP		
LCMS (LANCOM Management System)			
LANconfig	Configuration program for Microsoft Windows, incl. convenient Setup Wizards. Optional group configuration, simultaneous remote configuration and management of multiple devices over ISDN dial-in or IP connection (HTTPS, HTTP, TFTP). A tree view of the setting pages like in WEBconfig provides quick access to all settings in the configuration window. Password fields which optionally display the password in plain text and can generate complex passwords. Configuration program properties per project or user. Automatic storage of the current configuration before firmware updates. Exchange of configuration files between similar devices, e.g. for migrating existing configurations to new LANCOM products. Detection and display of the LANCOM managed switches. Extensive application help for LANconfig and parameter help for device configuration. LANCOM QuickFinder as search filter within LANconfig and device configurations that reduces the view to devices with matching properties		
LANmonitor	Monitoring application for Microsoft Windows for (remote) surveillance and logging of the status of LANCOM devices and connections, incl. PING diagnosis and TRACE with filters and save to file. Search function within TRACE tasks. Wizards for standard diagnostics. Export of diagnostic files for support purposes (including bootlog, sysinfo and device configuration without passwords). Graphic display of key values (marked with an icon in LANmonitor view) over time as well as table for minimum, maximum and average in a separate window, e. g. for Rx, Tx, CPU load, free memory. Monitoring of the LANCOM managed switches. Flick easily through different search results by LANCOM QuickFinder		
Firwall GUI	Graphical user interface for configuring the object-oriented firewall in LANconfig: Tabular presentation with symbols for rapid understanding of objects, choice of symbols for objects, objects for actions/Quality of Service/remote sites/services, default objects for common scenarios, individual object definition (e.g. for user groups)		
Automatic software update	Voluntary automatic updates for LCMS. Search online for LCOS updates for devices managed by LANconfig on the myLANCOM download server (myLANCOM account mandatory). Updates can be applied directly after the download or at a later time		
Management	Management		
WEBconfig	Integrated web server for the configuration of LANCOM devices via Internet browsers with HTTPS or HTTP. Similar to LANconfig with a system overview, syslog and events display, symbols in the menu tree, quick access with side tabs. WEBconfig also features Wizards for basic configuration, security, Internet access, LAN-LAN coupling. Online help for parameters in LCOS menu tree		
Alternative boot configuration	During rollout devices can be preset with project- or customer-specific settings. Up to two boot- and reset-persistent memory spaces can store customized configurations for customer-specific standard settings (memory space '1') or as a rollout configuration (memory space '2'). A further option is the storage of a persistent standard certificate for the authentication of connections during rollouts		
Automatic update from USB	Automtatic upload of appropriate firmware and configuration files on insertion of USB memory (FAT filesystem) into USB interfaces of LANCOM routers with factory settings. The function can be activated to be used during operation of configured devices. The router checks the files' dates and versions against the current firmware before upload		

Social publish in the RAM Size depending on device memory to store executs for diagnosis. Default set of nules for the event protocol in Spiskog. The decided can be emidded for each be emidded for the execution of the execution	Management	
Access rigids Individual access and function rigids for up to 16 administration. Power supply 12 V DC, external power adapter (230 V) with bayonet cap to protect against accidentally unplugging	Hardware	
	Power supply	12 V DC, external power adapter (230 V) with bayonet cap to protect against accidentally unplugging

Hardware			
Environment	Temperature range 5–40° C; humidity 0–95%; non-condensing		
Housing	Robust synthetic housing, rear connectors, ready for wall mounting, Kensington lock; 210 x 45 x 140 mm (W x H x D)		
Fans	None; fanless design without rotating parts, high MTBF		
Power consumption (max)	13.5 Watt		
Declarations of conformity			
CE	EN 55022, EN 55024, EN 60950		
Package content			
Manual	Hardware Overview (EN, DE), Installation Guide (DE/EN/FR/ES/IT/PT/NL)		
CD/DVD	Data medium with firmware, management software (LANconfig, LANmonitor, LANCAPI) and documentation		
Cable	1 Ethernet cable, 3 m		
Cable	VDSL/ADSL cable, 3m		
Cable*	ISDN cable, 3m		
Power supply unit	External power adapter (230 V), NEST 12 V/1.5 A DC/S, coaxial power connector 2.1/5.5 mm bayonet, temperature range from -5 to +45° C, LANCOM item no. 110723 (EU)/LANCOM item no 110829 (UK)		
Support			
Warranty	3 years Support via Hotline and Internet KnowledgeBase		
Software updates	Regular free updates (LCOS operating system and LANCOM Management System) via Internet		
Options			
VPN	LANCOM VPN-25 Option (25 channels), item no. 60083		
LANCOM Content Filter	LANCOM Content Filter +10 user, 1 year subscription		
LANCOM Content Filter	LANCOM Content Filter +25 user, 1 year subscription		
LANCOM Content Filter	LANCOM Content Filter +10 user, 3 year subscription		
LANCOM Content Filter	LANCOM Content Filter +25 user, 3 year subscription		
Advance Replacement	LANCOM Next Business Day Service Extension CPE, item no. 61411		
Warranty Extension	LANCOM 2-Year Warranty Extension CPE, item no. 61414		
Accessories			
Documentation	LANCOM LCOS Reference Manual (EN) online at http://www.lancom-systems.eu/publikationen/		
19" Rack Mount	19" Rackmount-Adapter, ArtNr. 61501		
Analog modem backup/serial adapter	LANCOM Serial Adapter Kit, item no. 61500		
VPN Client Software	LANCOM Advanced VPN Client for Windows XP, Windows Vista, Windows 7, single license, item no. 61600		
VPN Client Software	LANCOM Advanced VPN Client for Windows XP, Windows Vista, Windows 7, 10 licenses, item no. 61601		
VPN Client Software	LANCOM Advanced VPN Client for Windows XP, Windows Vista, Windows 7, 25 licenses, item no. 61602		
VPN Client Software	LANCOM Advanced VPN Client for Mac OS X (10.5 Intel only, 10.6 or higher), single license, item no. 61606		
VPN Client Software	LANCOM Advanced VPN Client for Mac OS X (10.5 Intel only, 10.6 or higher), 10 licenses, item no. 61607		
Item numbers			
LANCOM 1681V (VDSL2/ADSL2+ over ISDN)	62000		
LANCOM 1681V (VDSL2/ADSL2+ over POTS)	62001		
LANCOM 1681V (UK, over POTS)	62002
