#### **Federal Communication Commission Interference Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

. Reorient or relocate the receiving antenna.

. Increase the separation between the equipment and receiver.

. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

. Consult the dealer or an experienced radio/TV technician for help.

#### FCC Part 15.19 Caution:

- 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - (1) this device may not cause harmful interference and
  - (2) this device must accept any interference received, including
  - interference that may cause undesired operation
- 2. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.
- 3. Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user authority to operate the equipment.

### **IMPORTANT NOTE:**

#### FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

#### 802.11a (UNII) RF exposure statement

According to FCC 15.407(e), the device is intended to operate in the frequency band of 5.15GHz to 5.25GHz under all conditions of normal operation. Normal operation of this device is restricted to indoor used only to reduce any potential for harmful interference to co-channel MSS operations.

# Installing the software of USB Adapter

- 1. Select the setup file to install. The setup program will detect user's language automatically.
- 2. The setup program will install the driver and utility to computer. Please click the "Next" button to continue.

3. The software installation should begin. This may take a few minutes.

4. Once the installation success, click "Yes" to restart your system (recommended). Otherwise, click "No" to restart your system later.

5. Once the installation complete, you may now configure your wireless network.

# Configuring your wireless network (with Wireless Utility)

- 1. Windows XP users, if you chose "Microsoft Zero Configuration Tool" during the software installation please skip to page 11.
- 2. Double click on the computer with wireless signal icon in your taskbar or the shortcut icon on the desktop.

3. It should pop up the Wireless Utility window. And then utility shows the connecting wireless network that connected automatically or was the default network in profile.

# Wi-Fi Protect Setup (WPS)

WPS is an easy and secure setup solution for Wi-Fi network. Please click the Wi-Fi Protect Setup tab. dongle has two methods, PIN (Pin Input Config) and PBC (Push Button Config), to setup the network.

Realtek RTL819	Wi-Fi Protected Setup (WPS) An easy and secure setup solution for Wi-Fi network Pin Input Config (PIN) After pushing the PIN button.Please enter the PIN code into your AP.
	PIN Code : 386984//
	Pin Input Contig (PIN) Push Button After pushing the PBC button.Please push the physical button on your AP or visual button on the WPS config page.
	Push Button Config (PBC)

### Pin Input Config (PIN)

 Click on the "Pin Input Config (PIN)" button, and then it should pop up a message box. If you want to connect to a specific AP, please click the "Yes" button. Or please click the "No" button to continue and skip to step3.

Note: Every time you click the tab to change the page, the PIN code will be changed.

# Wireless Zero Configuration Troubleshooting

If you are Windows XP user and you can not see the check option of "Windows Zero Config", such as following figure, please do the following steps.

1. Click on your start menu and then click the "control panel" into control panel. Next click the "Administrative Tools".

2. Click on the "Services" item.

 It will pop up the Services window. Select the "Wireless Zero Configuration" or "Wireless Configuration" item and double click it.
