Chapter 1 - Product Overview

Package Contents

The following items are included in your AirStation package. If any of the items are missing, please contact your vender.

- AirStation 1
- AirStation Setup Card 1
- AC adapter 1
- Ethernet Cable 1
- Quick Setup Guide..... 1
- Warranty Statement..... 1

Hardware Overview

Front Panel LEDs

- 1 AOSS button** To initiate AOSS, hold down this button until the wireless LED flashes (about 1 second). Then, push or click the AOSS button on your wireless client device to complete the connection. Both devices must be powered on for this to work.

- 2 Power/Diag LED (Green or Red)**
 - On (Green): Power is on.
 - Off: Power is off.
 - On (Green)*1: Booting.
 - 2 blinks (Red)*2: Flash ROM error.
 - 3 blinks (Red)*2: Wired Ethernet LAN error.
 - 4 blinks (Red)*2: Wireless LAN error.
 - 5 blinks (Red)*3: IP address setting error.
 - 9 blinks (Red)*2: System error.

Continuously blinking*1: Updating firmware, saving settings, or initializing settings.

- *1 Never unplug the AC adapter while the Buffalo LED is blinking continuously.
- *2 Turn off AirStation first, wait for a few seconds, then turn it back on.
- *3 Because the network addresses of both the Internet port (WAN port) and the LAN port are the same, it is not possible to establish communication. Change the LAN-side IP address of the AirStation.

3 Wireless LED (Green or Orange)

- On: Wireless LAN is enabled.
- Double blinks: AirStation is waiting for an AOSS or WPS security key.
- Continuously blinking: AOSS/WPS error; failed to exchange security keys.
- Off: Wireless LAN is disabled.

Note:

Wireless LED is Green : Security settings have been made for the wireless LAN.

Wireless LED is Orange : Security settings have not been made for the wireless LAN.

4 Internet access LED (Green)

- On: Internet access is available.
- Off: Internet access is not available.
Router functionality is disabled.

5 Router LED (Green)

- On: Router functionality is enabled.
- Off: Router functionality is disabled.

Back Panel

6 Router Switch

- On: Router functionality is enabled (router mode).
- Off: Router functionality is disabled (bridge/AP mode).
- Auto: This switches between modes automatically based on whether or not another router is detected on the Internet port. The default setting for this switch is Auto.

7 LAN Port

Connect your computer, hub, or other Ethernet devices to these ports. This switching hub supports 10 Mbps and 100 Mbps connections.

8 Internet Port

10 Mbps and 100 Mbps connections are supported.
Note: In bridge/AP mode (router off), the Internet port becomes a regular LAN port, for a total of 5 usable LAN ports.

9 Reset button

To reset all settings, hold down this button until the Power LED turns red (about 3 seconds). The power must be on for this to work.

10 DC connector

Connect the included AC adapter here.

Bottom

11 Setup card slot

This is the slot where the AirStation setup card is stored. The initial settings for the username, password, SSID, and encryption type are provided on the card for logging into Settings.

Chapter 2 - Installation

Initial Setup

To configure your AirStation, follow the procedure below.

- 1 Verify that you can connect to the internet without the AirStation, then turn off your modem and computer.

- 3 Plug one end of the LAN cable into your modem and the other end to the AirStation's Internet (WAN) port. Turn on the modem.

4 Turn on the AirStation, then wait one minute.

5 If using a wired LAN, connect the AirStation LAN port and computer using a LAN cable. If using a wireless LAN, connect the computer to the wireless LAN.

6 Once your computer has booted, the AirStation's LEDs should be lit as described below:

| | |
|-----------------|-----|
| Power | On. |
| Wireless | On. |
| Internet access | On. |
| Router | On. |

For LED locations, refer to chapter 1.

Note: If the router LED is not lit, hold down the router button to switch to router mode.

- 7** Launch a web browser. If the home screen is displayed, setup is complete. If username and password fields are displayed, enter “admin” for the username and “password” for the password, then click [OK]. Step through the wizard to complete setup.

You’ve completed the initial setup of your AirStation.

Appendix A - Specifications

WHR-600D

| Wired LAN Interface | |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Standard Compliance | IEEE802.3u (100BASE-TX), IEEE802.3 (10BASE-T) |
| Transmission Rate | 10 / 100 Mbps |
| Transmission Encoding | 100BASE-TX 4B5B/MLT-3, 10BASE-T Manchester Coding |
| Access Method | CSMA/CD |
| Speed and Flow Control | 10 / 100 Mbps, Auto Sensing, Auto MDIX |
| Number of LAN Ports | 4 |
| LAN Port Connector | RJ-45 |
| Wireless LAN Interface | |
| Standard Compliance | IEEE802.11n/a/g/b |
| Transmission Method | Direct Sequence Spread Spectrum (DSSS), OFDM, MIMO |
| Frequency Range | Available frequencies depend on the country of purchase. See the next page for details. |
| Transmission Rate 802.11n/a/b/g | 802.11n: 20 MHz BW (Long GI) 130, 117, 104, 78, 52, 39, 26, 13 Mbps (2 stream) 65, 58.5, 52, 39, 26, 19.5, 13, 6.5 Mbps (1 stream) 20 MHz BW (Short GI) 144.4, 130, 115.6, 86.7, 57.8, 43.3, 28.9, 14.4 Mbps (2 stream) 72.2, 65, 57.8, 43.3, 28.9, 21.7, 14.4, 7.2 Mbps (1 stream) 40 MHz BW (Long GI) 270, 243, 216, 162, 108, 81, 54, 27 Mbps (2 stream) 135, 121.5, 108, 81, 54, 40.5, 27, 13.5 Mbps (1 stream) 40 MHz BW (Short GI) 300, 270, 240, 180, 120, 90, 60, 30 Mbps (2 stream) 150, 135, 120, 90, 60, 45, 30, 15 Mbps (1 stream) 802.11a/g: 54, 48, 36, 24, 18, 12, 9, 6 Mbps 802.11b: 11, 5.5, 2, 1 Mbps |
| Access Mode | Infrastructure Mode |
| Security | AOSS, WPA2-PSK (TKIP/AES), WPA/WPA2 mixed PSK, WPA-PSK (TKIP/AES), 64-bit or 128-bit WEP, Mac Address Filter |

| Other | |
|-----------------------|----------------------------------------------------|
| Power Supply | External AC 100-240 V Universal, 50/60 Hz |
| Power Consumption | About 20 W (Max) |
| Dimensions | TBD |
| Weight | TBD |
| Operating Environment | 0 - 40° C (32 - 104° F), 10 - 85% (non-condensing) |

| 802.11a Frequency Range | |
|--------------------------------|---------------------------------------------------------------------------------------------|

Appendix B - Environmental Information

- The equipment that you have purchased has required the extraction and use of natural resources for its production.
- The equipment may contain hazardous substances that could impact health and the environment.
- In order to avoid the dissemination of those substances in our environment and to diminish the pressure on the natural resources, we encourage you to use the appropriate take-back systems.
- The take-back systems will reuse or recycle most of the materials of your end life equipment in a sound way.
- The crossed-out wheeled bin symbol invites you to use those systems.

- If you need more information on collection, reuse, and recycling systems, please contact your local or regional waste administration.

Appendix C - GPL Information

The source code for Buffalo products that use GPL code is available at <http://opensource.buffalo.jp/>.
