# PRODUCT SETUP

## HARDWARE SETUP

### INSTALL THE SIM CARD

Open the SIM card and battery compartment, located on the bottom of the device. Insert the SIM card by lining up the contact points on the SIM card with the contact points in the SIM card compartment.

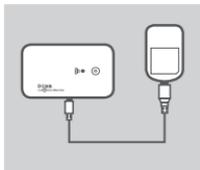

### INSTALL THE BATTERY

Insert the battery by lining up the contact points on the battery with the contact points in the battery compartment. The included battery lasts up to four hours.

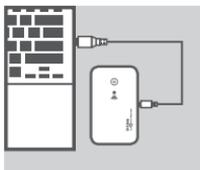

**Note:** The battery is required to power the DIR-457U myPocket Router in either WiFi router or USB modem mode.

## POWER MANAGEMENT

### CHARGING WITH THE POWER ADAPTER

To charge the battery, insert the USB cable into the USB port of the power adapter and plug the power adaptor into a wall socket. Then insert the USB cable into the Mini-USB port of the DIR-457U myPocket Router. While charging, the Power/3G network LED will flash. When battery power is low, the LED will flash red.

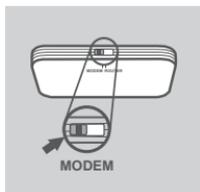

### CHARGING WITH THE USB CABLE

Alternatively, insert the USB cable into the Mini-USB port of the DIR-457U myPocket Router and the other end into a free USB port of your computer. While charging, the Power/3G network LED will flash. When battery power is low, the LED will flash red.

**Note:** Charging the battery via a USB port is slower than charging it using the power adapter.

# PRODUCT SETUP

## CONNECTION SETUP

### USB MODEM MODE/CONNECTION MANAGER MODE

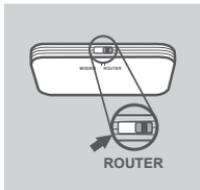

1. Move the router/modem selection switch to USB modem mode.
2. Connect the DIR-457U myPocket Router to your computer with the included USB cable. To do this, insert the USB cable into the Micro-USB port of the DIR-457U myPocket Router and the other end into a free USB port of your computer.
3. Press the power button on the DIR-457U.
4. The Connection Manager software will automatically start up.
5. Configure your router/modem settings using the Connection Manager.
6. You can now use the DIR-457U myPocket Router as a USB modem.

**Note:** You have to install the Connection Manager software when using the DIR-457U for the first time. After successful installation, you can configure USB modem and WiFi router basic settings. Only USB modem mode serves as Connection Manager mode.

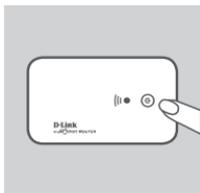

# PRODUCT SETUP

## CONNECTION SETUP

### WiFi ROUTER MODE

1. Move the router/modem selection switch to WiFi router mode.

2. Press the power button on the DIR-457U.

3. You can now use the DIR-457U myPocket Router as a wireless access point and connect to the router with any WiFi capable device.

# TROUBLESHOOTING

## SETUP AND CONFIGURATION PROBLEMS

### 1. HOW DO I CONFIGURE MY DIR-457U MYPOCKET ROUTER WITHOUT THE CD, OR CHECK MY WIRELESS NETWORK NAME (SSID) AND WIRELESS ENCRYPTION KEY?

- Open the D-Link Connection Manager and go to the WiFi Router settings page.
- Alternatively, connect your DIR-457U to your PC wirelessly. Open a web browser and enter the address `http://192.168.0.1`

### 2. WHAT IF I FORGOT THE USERNAME AND PASSWORD FOR MY DIR-457U MYPOCKET ROUTER?

- The default username is admin. The default password is blank (leave this box empty).
- If you have changed the password and cannot remember it, you will need to reset the product to set the password back to default. Press the reset key located on the back of the device.

### 3. WHY IS MY DEVICE NOT POWERED?

- Check if the contact points on the battery are lined up with the contact points in the battery compartment.
- Make sure the battery is properly charged. To do so, plug in the power adapter for at least two hours.

### 4. WHAT DOES A SOLID RED POWER LED MEAN?

- A solid red power LED indicates a problem with the SIM card or service coverage.
- Check if the contact points on the SIM card are lined up with the contact points in the SIM card compartment.
- Make sure you are inside the coverage area of your network service provider. If you cannot receive a signal, you cannot connect to a 3G network.

### 5. WHAT DOES A BLINKING RED POWER LED MEAN?

- A blinking red power LED indicates that the battery is almost out of power. Please refer to the Power Management section on how to properly charge your battery.

### 6. HOW DO I TURN OFF MY DIR-457U MYPOCKET ROUTER?

- Press and hold the power button for two seconds until the device LEDs turn off.

### 7. HOW DO I RESET MY DIR-457U MYPOCKET ROUTER?

- Press and hold the reset button for five seconds until the device restarts. The device will return back to default settings.

### 8. WHY DOES THE BATTERY NOT CHARGE USING THE USB POWER CABLE?

- If the battery does not charge using the USB cable, there might be a problem with your computer's USB port.
- Charge the battery using the included USB power adapter.

You can find software updates and user documentation on the D-Link website.
