D-Link Quick Installation Guide

This product can be set up using any current web browser, i.e., Internet Explorer 6 or Netscape Navigator 6.2.3.

DVA-G3340S Wireless ADSL VoIP Router

Before You Begin

If you purchased this Router to share your high-speed Internet connection with other computers, you must have an established Internet account from an Internet Service Provider (ISP). It's best to use the same computer that is connected to your router for configuring the DVA-G3340S Wireless ADSL VoIP Router. The DVA-G3340S acts as a DHCP server and will assign all the necessary IP address information on your network. See part 2 of this Quick Installation Guide or the Manual on the CD-ROM for setting each network adapter to automatically obtain an IP address.

Check Your Package Contents

Connecting the Router to your Computer

- A. First, connect the power adapter to the power input at the back panel of the DVA-G3340S and then plug the other end of the power adapter to a wall outlet or power strip. Press the ON switch on the back of the unit. On the front of the device, the Power LED will turn ON to indicate proper operation.
- B. Insert one end of the Ethernet cable into an Ethernet (LAN) port on the back panel of the DVA-G3340S and the other end of the cable to an Ethernet Adapter or available Ethernet port on your computer.
- C. Insert the telephone cable included with the Router into the ADSL port, and then connect the cable to your telephone line.
- **D.** Check the LED display on the front of the Router to confirm that the connections have been made.

To connect to the network, make sure the network adapter in your computer is configured properly. Here's how to configure the network adapter to obtain an IP address automatically for the DVA-G3340S Wireless ADSL VoIP Router.

For Microsoft Windows XP

| The dialog box displays a list of currently installed network items. | Local Area Connection 2 Properties ? > General Authentication Advanced Connect using: D-Link Virtual Miniport Software for Ethernet Configure This connection uses the following items: | | | | |
|--|---|--|--|--|--|
| Click Internet Protocol (TCP/IP) | Client for Microsoft Networks Client for Microsoft Networks Client for Microsoft Networks Client Server Card Software Transport Client Protocol (TCP/IP) Install Properties | | | | |
| Click Properties | Description Transmission Control Protocol/Internet Protocol. The default wide area network protocol that provides communication across diverse interconnected networks. Show icon in notification area when connected OK Cancel | | | | |

| Make the choice to get the IP settings assigned automatically. | Internet Protocol (TCP/IP) Properties General Alternate Configuration You can get IP settings assigned automatically if your network supports this capability. Otherwise, you need to ask your network administrator for the appropriate IP settings. |
|--|--|
| Select Obtain an IP address automatically | Dbtain an IP address automatically Use the following IP address: |
| | IP address: |
| | Subnet mask: |
| | Default gateway: |
| | Obtain DNS server address automatically |
| | O Use the following DNS server addresses: |
| | Preferred DNS server: |
| | Alternate DNS server: |
| | Advanced |
| Click OK. | OK Cancel |

Connecting Additional Computers to the DVA-G3340S Wireless ADSL VoIP Router

Using additional Ethernet (CAT5 UTP) cables, connect your Ethernet equipped computers to the LAN ports on the back panel of the DVA-G3340S.

When you have completed the steps in this **Quick Installation Guide**, your connected network should look similar to this:

Initial Web Configuration

Open your Web browser and type http://10.1.1.1 into the URL address box. Press Enter or Return.

| The login dialog box appears: | Connect to 10.1.1.1 ? | × |
|---|-----------------------|---|
| When you first log in the User name is admin and the Password is also admin. These may be changed later. | | |
| Click OK. | OK Cancel | כ |

The **Home > Wizard** window appears:

Click the Run Wizard button at the bottom of the page to commence the Setup Wizard. This will guide you through the steps in order to configure your Internet, Wireless and VoIP settings.

Click the **Next** button to continue.

Step 3: Set Wireless LAN Connection

In this step we will configure your Wireless LAN settings.

Please note: You can turn off this feature by disabling the tick next to Enable AP and click the **Next** button.

| http://10.1.1.1/cgi-bin/webcm?getpage=/html/home/ D-Link DVA-G3340S Setup Wizard | |
|--|-------|
| Set Wireless LAN Connection Enter the SSID name and channel number to be used for the Wireless LAN. If you wish to use encryption, enable it below and enter the correct values. Click Next to continue. | |
| SSID: Channel: Security: Channel: Security: Channel: Channel: Security: Channel: Security: Channel: Chann | eless |
| Click the Next button. | |
| | |
| 🗑 Done | |

Enter the **SSID** (Wireless Network Name) and **Channel** number you would like to use for your Wireless LAN. *We strongly recommend that you enable the security feature to keep unwanted users off your Wireless LAN.*

Click Next to continue.

Step 4: Set VoIP Account Information

In this step we will configure your VoIP Account in order to make calls over the Internet.

Enter your VoIP providers Server details into the **Server Address** field. Enter your VoIP Phone Number/ISN into the **Phone Number** and **Username** fields.

Enter your VoIP Password into the Password field.

You can also configure a second number into this device by filling in all of the Line 2 fields.

Click Next to continue.

Step 5: Save and Restart

This step will now save and restart the DVA-G3340S with the above changes we have made and try to establish your connection to the Internet and VoIP Provider.

Click the Restart button to save the settings and restart the router.

Technical Support

You can find software updates and user documentation on the D-Link website.
